

Colour me in: Hedgehog

Did you know hedgehogs sleep during the day and only come out at night?

Hedgehogs are very energetic - they can swim, dig and travel 2-3km in one night. But if they're scared, instead of running away, they roll up in ball and are protected by their prickles.

The best thing to offer hedgehogs to eat is hedgehog food, meaty pet food or dry biscuit cat food. Remember to leave some fresh water too, but never milk.

Hedgehogs are gardeners' friends as they eat up slugs and snails that might damage plants.
