

Rainbow walk activity

Sometimes we see rainbows in the sky and in the colours of our wildflower meadows. Did you know meadows attract bees, butterflies, moths and hover flies?

Can you find a rainbow of colours on a walk, in your garden or at the park this week?

Red and yellow and pink and green,
purple and orange and blue...

Top tip! 📷 Taking photos is a great way to record your rainbow of nature colours, while leaving leaves and flowers for all the insects that need them.
